Education

L.J. Institute of Engg. & Tech. (LJIET) | 2025 – 2028

B.E., Computer Engineering, Ahmedabad, Gujarat

Darshan University | 2022 – 2025

Diploma, Computer Science, Rajkot | **CGPA: 9.19**

Skills

Languages: Python, TypeScript, JavaScript, SQL

AI/ML: Scikit-Learn, XGBoost, LightGBM, TensorFlow, PyTorch, Pandas, NumPy, OpenCV

Backend/APIs: FastAPI, REST, WebSocket, JWT, Pydantic

Databases: MongoDB, Firebase, Supabase, MSSQL

Frontend: React, Tailwind CSS, Three.js

Tools: Git, Docker, Postman, Linux, Netlify, Render, CI/CD

Work Experience

Udanix.com | Backend & API Developer (Freelance) – Remote

Aug 2025 – Feb 2026

- Built a booking-system backend with **FastAPI** and **REST APIs**, implementing availability logic and slot-conflict prevention for a travel platform, backed by **Firebase/Supabase**.
- Integrated 3 third-party REST APIs (scheduling, payments, notifications) with retry logic; documented endpoints via **OpenAPI/Swagger**.

D’Furn India | ERP Developer – Ahmedabad, India

Feb 2026 – May 2026

- Built inventory, order-management, and reporting modules using **React** on the frontend and **MSSQL**-backed backend logic for an internal ERP, replacing manual spreadsheet workflows.
- Translated business requirements into MSSQL schemas and backend logic, working through review cycles with non-technical stakeholders.

Projects

Nexora | Python, FastAPI, React, Scikit-Learn, XGBoost | [Live](#) · [GitHub](#)

2025 – 2026

- AutoML engine that ingests a raw CSV and autonomously runs type inference, imputation, and encoding – benchmarking **256+ models** with a live WebSocket leaderboard.
- Deployed end-to-end (FastAPI/Render, React/Netlify, MongoDB Atlas) with API-key prediction endpoints, batch inference, and feature-drift detection.

Eye-X | Python, FastAPI, MongoDB, WebRTC, MediaPipe | [GitHub](#)

2025

- Designed a distributed real-time attendance architecture using **MediaPipe** face/head-pose detection running on-device across multiple entry points.
- Built a **WebRTC** video pipeline streaming structured JSON events to a FastAPI backend, storing analytics in MongoDB.

Virtual Hand Controller | Python, MediaPipe, OpenCV, PyAutoGUI | [GitHub](#)

2025

- Built a zero-hardware gesture interface: **MediaPipe**'s 21-landmark hand graph drives mouse/keyboard events via PyAutoGUI in real time.

Trekverse | Flutter, Dart, Firebase | [GitHub](#)

2024 – 2025

- Built a cross-platform **Flutter** trekking app where users browse, wishlist, and rate packages from verified brands.
- Implemented an admin panel and **Firebase Auth**-based authentication with Provider state management.

Certifications & Awards

Oracle Cloud Infrastructure 2025 Certified DevOps Professional – Oracle (Sep 2025)

NASA International Space Apps Challenge 2025 – Galactic Problem Solver (Oct 2025)

Deloitte Australia – Technology Job Simulation – Forage (Aug 2025)

Introduction to Large Language Models (MDL-568) – IBM SkillsBuild (Apr 2025)
